Ayer's Ague Cure,

For Fover and Ague, Intermittent Pover, cor rover and rights, intermittent Fover, Comb Ague, Periodical or Bilious Fever, &c., and indeed all the affections which arise from malarious, marsh, or minematic poisons.

No one remedy is louder called for by the necessities of the American people than a sure and safe cuto for Feren and Ague. Such we are now enabled to offer, with a perfect certainty that it will eradicate the disease, and with assurance, founded on proof, that no harm can arise from its use in any quantity.

That which protects from or provents this disorder must be of immense service in the communities where it prevails. Prevention is better than cure, for the nationt escapes the risk which he must run in violent attacks of this baleful distenper. This "CURE" expels the missmatic poison of Feven and Ague from the system, and prevents the development of the disease, if taken on the irrst approach of its premonitory symptoms. It is not only the best remedy everyet discovered for this class of compliaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of everybody; and in billious districts, where Feven And Ague prevails, overybody should have it, and use it frosly, both for cure and protection. It is hoped this price will place it within the reach of all—the poor as well as the rich. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of intermittents is, that it contains no Quinism or other injurious effects whatever upon the constitution. Those cured by it are left as healthy as if they had nover had the disease.

Fover and Ague is not alone the consequence of the missmate poison. A great variety of disorders arise from its irritation, among which are Neuralgia, Hadmanhan, Gout, Headache, Bilindness, Toothache, Earache, Catarria, Asthana, Papitaliou, Fainful Affection of the Spicen, Hysterice, Pain in the Bowels, Colic, Parnivsis, and derangement of the Stomach, all of which, when originating in the scause, put on the intermittent type, or become periodical. This equilibrium the reach of the spicen, in sufficient quantity to ripen into disease.

For Liver Camplatists, arising from torpidively the Liver, it is an excelle

For Bropsy and Bropsical Swellings, they should be taken in large and frequent closes to profile the critect of a drastic parge.

For Asppression a large case should be taken, as it produces the desired effect by symmetric profile. taken, as if produces the desired effect by sympathy.

As a Dinnor PHI, take one or two PHIs to promote digestion and reflect the stomach.

An occasional close, simulates the stomach and bowels, restores the appetite, and mylgorates the system. Hence it is often advantageous where no serious decangement exists, the who feels tolerably well, often finds that a doc of these PHIs makes him feel decidedly before, from their densiting and renovating effect or the digestive Apparatus.
